

To the Honorable Federal Communications Commission:  
I very much enjoy listening to Satellite radio. It provides me with listening options that are not available on AM or FM.

XM radio now provides me with traffic and weather reports. To have the NAB to say that I can't receive weather and traffic reports is flatly ridiculous. I urge you to ignore the wailing of the radio fat-cats and allow me, as a middle-class American, to listen to whomever I choose. I can see no reasonable objection other than the monopoly of radio broadcast owners who may lose a few dollars to a competitor.

I?m an American: I have the right to choose whom I listen to and I choose XM radio. Don't limit my FREEDOM of choice.

Respectfully,  
Guy Fowler
